## BUILDING AGRICULTURE SINCE 1978

### Working alongside farmers nationwide by supplying high-quality roofing products direct to their farms

#### Farming family owned business based in the heart of Somerset, UK

We are the UK's leading supplier and manufacturer of Fibre Cement, holding the largest stock of sheets in Europe. The Briarwood production facility and distribution centre provides a seamless supply chain of the finest roofing systems and building products for the agricultural, industrial and domestic sectors – direct to clients from the factory floor.

As a British Farming Family, supporting the British Agricultural market has always been our goal. We have been helping to develop farms since 1978 by supplying the highest quality products specifically designed for the UK to help increase production and efficiency.

#### About our family of businesses

Our British business was established over 40 years ago by Alan Janes, a Somerset Farmer, naming the company after the family farm 'Briarwood'.

Briarwood manufacture EUROSIX and a full range of fittings on multiple custom-built production lines. By managing our own dedicated production lines, it enables us to have complete control over the manufacturing process which enables production of the highest quality fibre cement products.

Whilst our business continues to thrive, our farms continue to operate and grow - keeping our farming roots close to heart.

## We can offer you the solution to match your farm's exact needs.

**Ensuring you get the best products for your farm, with options to suit all budgets**

### **Choosing the right products for your roof**

Whilst one of the primary objectives when setting out a structure is for it to sit naturally in its environment, it is important to understand that the building must be designed so that it is practical, safe and there to last for generations to come.

Briarwood have fibre cement sheets available at the best price compared to our competition. We also have a huge range of fittings and accessories to compliment the sheets.

### **Customer service and sales**

We have a high-skilled internal customer service team who are readily available to cater to your farm building needs.

### **Talk to our technical department**

Whatever your roofing project requirements, our technical department will help you understand everything you need to get the best for you and your farm.

## DAIRY & BEEF

## EQUESTRIAN

## SHEEP

## PIGGERIES

### Protecting your cattles animal welfare

Having a well-ventilated cattle building is essential for looking after your livestock's mental and physical wellbeing. Briarwood manufacture ventilation systems which thousands of farmers in Great Britain have been using for over 40 years.

### Create the perfect environment for your horses

As horses are generally quite mild mannered and sensitive animals, it is important to ensure that they are comfortable wherever they go. Our EUROSIX fibre cement sheeting is the best roofing solution for the equestrian market due to their ability to reduce noise and condensation, making the environment a healthy space to be in.

### Housing sheep in the best conditions

Different livestock have different requirements, therefore maintaining the temperature and humidity is a key factor when it comes to designing a structure. Our EUROSIX fibre cement sheeting has great absorption properties allowing the living space to stay warm in the winter, and cool in the summer, and with many options for ventilation to reduce moisture building up within the structure.

### Reducing ammonia build-up

Briarwood understand the requirements for your roof when it comes to planning and designing a structure to house pigs. Our EUROSIX fibre cement sheets are a perfect solution to ensure that your pigs are looked after from the naturally occurring elements, whilst also protecting them from the build-up of ammonia.

## MACHINERY

## CROPS & ARABLE

## STORAGE

## OTHER BUILDINGS

## Protecting your farms biggest investments

Keep the assets which run your farm protected and secure by using our EUROSIX fibre cement sheeting for the roof and vertical detail of your building. Our EUROSIX fibre cement sheets are extremely durable and reinforced with polypropylene strips which run the entire length of the sheet.

## Increase the lifespan of our food

When it comes to harvesting crops, it is important to consider how the crop is stored and where it is stored - too much or too little moisture can harm your crop therefore ruining your investment. Due to our EUROSIX fibre cement properties, our sheets are perfect at maintaining the level of moisture and also reduces condensation; thus protecting your crop.

## Durable warehouse and storage roofing

Protect your storage by using a practical, long lasting, durable and safe roofing product; EUROSIX is a cost effective and long lasting solution for any building.

## Roofing sheets suitable for all applications

EUROSIX is an ideal roof covering for many smaller projects such as garages, outbuildings and stables due to its vapour permeability, excellent acoustic insulation properties and the ability to reduce condensation significantly.

# EUROSIX

EUROSIX fibre cement profiled sheets provide the optimal roofing or cladding solution for any agricultural, industrial, commercial and domestic building.

The fibre cement sheet allows natural ventilation to a building, absorbing condensation and promoting the flow of fresh clean air.

EUROSIX comes with a range of accessories designed to offer ventilation options to suit every building type.

It also provides natural thermal properties and acoustic insulation offering protection against harsher weather conditions.

### WHY INVEST IN EUROSIX?

- 30 year manufacturers guarantee
- Highest quality fibre cement roofing in Britain
- Perfect for cattle and dairy farming, equestrian centres and agricultural sheds
- Minimises condensation
- High resistance to corrosion
- Excellent acoustic insulation
- Low thermal conductivity reduces heat build-up in the summer and prevents heat loss in the winter
- Class 1 fire rated
- UKCA mark approved
- Manufactured to BS EN ISO 9001 standards
- Complies with BS EN 494 requirements for Class 1X sheeting
- Fully BBA Certified
- Wide range of accessories

## EUROSIX technical specifications

EUROSIX is a strong fibre cement sheet reinforced with polypropylene strips that have been inserted in specific locations which run along the entire length of the sheet; thus providing maximum impact strength without negatively affecting the look, durability and practability of the product.

**EUROSIX spaced fibre cement sheets are also available: please reach out to our sales team to learn more.**

### TECHNICAL DATA

Overall width	1086 mm
Cover width	1016 mm
Thickness	6.5 mm
Corrugation pitch	146.5 mm
Depth of profile	47.6 mm
Side lap	70 mm
Minimum end lap	150 mm
Minimum roof pitch	5°
Maximum unsupported overhang	350 mm
Standard colour	Natural grey
Class	C1X
Maximum purlin centres	1375 mm
Maximum rail centres	1825 mm
Approx.weight when installed	17kg/m2

### Quality and sustainability

Briarwood's EUROSIX fibre cement sheets conform to BS EN 494: 2004 Class C1X and are covered by an EN standard, UKCA and CE Mark. We adhere to ISO 9001 (Quality) and ISO 14001 (Environment) standards.

Briarwood offer a 30-year manufacturer's guarantee on all fibre cement sheets and a 10-year colour guarantee on all painted fibre cement sheets.

### RIDBA approved member

The Rural and Industrial Design and Building Association (RIDBA) is the leading trade association for the modern agriculture and industrial buildings industry in the UK. Briarwood Products are a proud member of the RIDBA association.

### Our factory to farmer guarantee

Briarwood understands the dedication and financial investment demanded by your farm, which is why we place great value on providing you with a sense of security. Count on our assurance of quality to meet your needs.

### BBA Agrément Certificate

BBA Agrément Certificate is a mark of excellence based on rigorous national and European standards that validate a construction product's specialist formulation, capability and uniqueness. Briarwood's EUROSIX fibre cement sheets and accessories (bargeboards, ridges and others) have all been awarded the BBA Agrément Certificate. Our certificate is available to view upon request if required when specifying projects.

## Advantages

✓	Natural ventilation	Natural thermal properties and sound insulation offering protection against more extreme weather conditions.
✓	6 inch profile	Suitable for new projects and extensions or maintenance to existing buildings.
✓	Durability	Maintenance free, resistant to rust, rot and corrosion and covered by a 30 year Manufacturer Guarantee.
✓	Insulation	Natural thermal properties and sound insulation offering protection against more extreme weather conditions.
✓	Colour options	Colour options to help new buildings fit seamlessly with the landscape and assist with planning approvals.

## Huge range of fibre cement accessories which compliment our EUROSIX range

Briarwood manufacture and supply fibre cement sheeting which come along with a full range of comprehensive fittings accessories.

Our fibre cement fittings and accessories come in natural grey as standard; however Briarwood have the capability to paint your sheets and fittings in any colour from our standard colour range or extended colour range.

# Metal Profiled Sheets

Briarwood manufacture metal profiled sheets to any length (going from 1 to 7 metres).

Used as either a form of external cladding or roofing application, metal profile sheets are most commonly used for agricultural, industrial, retail and leisure buildings.

The beauty when using metal profile sheets is that they can be installed vertically, horizontally or diagonally which will not limit your buildings design capabilities and aesthetics.

Metal profiled roofs (also referred to as box profile sheets, 32/1000 forward/reverse, corrugated metal roof sheets and more) have been used in the commercial and construction industry for over 100 years.

The primary reason is the fact that they offer numerous benefits including long life, appealing external building design styles and increases a buildings efficiency (such as keeping in heat if insulated).

## Profiled sheeting available

32/1000 FORWARD/REVERSE

34/1000 FORWARD/REVERSE

13.5/3 CORRUGATED

## Metal ridge cappings and corner barge flashings

Briarwood can supply all of your metal ridge cappings and corner barge flashings alongside your metal profiled sheeting; keeping everything inside of one order.

## Advantages

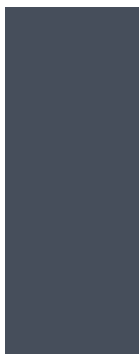

- ✓ **0.5/0.7 thickness** All metal roof sheets are available in 0.5 or 0.7 thicknesses
- ✓ **Polyester/Plastisol** Two unique finishes available with a life span of up to 30 years
- ✓ **Resistance** Unaffected by mould, mildew and fungi, and do not support vermin
- ✓ **Range of profiles** 32/1000, 34/1000, 10/3 and many more profiles available at Briarwood
- ✓ **Cut to length** Any sized length to suit any sized project
- ✓ **Anticon** Anticon available on all 0.7 thick profiles

# GRP Rooflights

Increase the % of natural light entering your building by adding clear translucent GRP rooflights alongside your chosen roofing sheet.

GRP rooflights are perfect for sheds, outbuildings, livestock barns, stables and other agricultural structures.

Natural light can be gained very effectively and also benefit the working environment within any building by installing GRP translucent rooflights.

GRP translucent glass fibre roof lights provides an even spread of natural light within any building and saves on electricity and energy costs by reducing the need for artificial lighting.

## Perfect for all sectors

AGRICULTURE

INDUSTRIAL

COMMERCIAL

## Obsolete GRP rooflights stocked at Briarwood

Do you have a roof profile which isn't manufactured anymore? The chances are that Briarwood have your profile available to purchase in both our fibre cement or metal profile sheets (including GRP rooflights)!

## Advantages

- ✓ **Save money** Due to increased natural light entering through the GRP rooflights, you'll save money on energy bills
- ✓ **Extremely durable** Durable CE marked GRP rooflights requiring little-to-no maintenance when laid
- ✓ **Durability** All Briarwood's stocked GRP rooflights are weather resistant with a 10 year guarantee
- ✓ **Range of profiles** Huge stock available in most fibre cement and metal roof sheet profiles
- ✓ **Safe GRP rooflights** All of the GRP rooflights stocked at Briarwood are CE marked to the strictest of safety standards
- ✓ **10 Year Guarantee** Briarwood have a 10 Year Manufacturers Guarantee on all GRP rooflights

# Guttering & Drainage Systems

Hunter Plastics are the UK's leading manufacturer of high quality above and below ground products. In most instances, it is common for someone to purchase roofing sheets whilst also buying the entire drainage system too.

As a named stockist for Hunter Plastics, we have hand picked the highest quality rainwater and underground systems products which are aimed to provide the perfect rainwater solution for your next building project.

Briarwood stock the best ranges from Hunter Plastics. This includes the most popular ranges such as Stormflo, Highflo, 112mm Half Round and more!

## HUNTER PLASTICS 200MM STORMFLO

Stormflo offers one of the largest capacity rainwater systems available in the UK today. 160mm downpipe ensures efficient rainwater drainage from even the largest of roof areas. Extra fixing points provided to withstand heavy snow loading and wind updrafts likely on remote and exposed buildings.

## HUNTER PLASTICS 170MM HIGHFLO

Designed for industrial and commercial uses, Highflo offers superior drainage for larger roof areas. Extra strong support brackets help to withstand heavy snow loading and wind updraft likely on exposed or remote buildings.

## HUNTER PLASTICS 125MM HIGHFLO

The deeper semi elliptical profile of the 125 system offers a superior flow rate for domestic/ light commercial applications. The 125 systems fast flow outlets allow a connection to both 68mm and 82mm downpipes, for greater installation flexibility.

## HUNTER PLASTICS UNDERGROUND DRAINAGE

Briarwood supply a comprehensive range of high quality Hunter Plastics drainage systems to overcome the most complicated drainage layouts. Like all Hunter Plastics products, they are economical, strong and resistant to impact and are easy to install.

## BRETT MARTIN 170MM DEEPSTYLE

Deepstyle 170 is a high performance industrial rainwater system offering increased drainage capacity for agricultural buildings, larger commercial projects, factories and warehouses.

## BRETT MARTIN 110MM SYSTEMS

Deepstyle is a semi elliptical gutter system which offers more effective rainwater drainage on larger roof areas. This can reduce the number of downpipes required, providing cost savings and perhaps overall appearance improvements.

#### WHY SHOULD YOU PURCHASE RAINWATER GOODS FROM BRIARWOOD?

- Guaranteed cheaper prices than any local stockist
- Huge stock holding of all PVC rainwater products
- Further discounts available when buying fibre cement roofing sheets
- Premium British drainage and rainwater system manufacturers
- Highest quality and durable PVC rainwater systems
- Corrosion free
- Requires little-to-no maintenance
- Well-established and trusted PVC rainwater brand
- Stock of both black and grey colours available
- Perfect solution for harvesting natural water on your structures

#### Above and below drainage systems

Hunter offers a wide range of high quality and easy-to-install rainwater systems for domestic, light industrial, commercial and agricultural applications.

# Timber and steel section purlins

Briarwood has a substantial stockholding of fully treated timber, whilst being able to supply a variety of different steel section purlins with complimenting accessories (such as sleeves, cleats and bolts).

Whatever the project specification, we can supply you with the highest-quality purlins money can buy in the UK; making your structure last longer with little maintenance required.

All purlins supplied by Briarwood have been tried and tested on thousands of projects over the last 40 years.

## Class C24-graded structural timber ready to go to your farm

Stocked timber purlins are available 15 and 20ft lengths. Adding these to your order makes Briarwood a true one-stop British company for all of your roofing needs.

#### TIMBER AND STEEL SECTION PURLINS AVAILABLE

- Thousands of timber purlins in-stock
- Different styles of steel section purlins available upon request
- 15 and 20ft timber lengths available
- Heavily discounted timber and steel purlins
- Purlins can be delivered to your business premise or direct to your customers site
- Fibre cement and metal roof sheet fixings and accessories available
- Class C24-graded timber meaning that it has been pressure treated to be more resistance against the natural elements
- High quality sawn timber come straight from the mill in Germany
- Premium timber products
- Long lifespan on our timber and steel purlins

### Thousands of timber purlins stocked at our headquarters

All of your roofing products placed in one order with Briarwood Products with delivery direct-to-site with exceptional lead times.

# Fixings & Accessories

Specifically designed for use with our full product range. We also supply fixings to complete any project including: Metal Profiled Sheets, GRP Rooflights and PVC Rainwater systems.

- Tek screws and caps
- Drive screws
- Hook bolts
- Lap locks/stitchers
- Fibre cement gutter sealers/fixings
- PVC rainwater goods fixings
